↓NOSSAFLEX

NOSSAFLEX is a system designed to help you organise your film photography. We've created a sheet to assist you with your photography. Read below to get an overview.

Note your settings down on the other side. Once you get your film scans back from your lab, rename them according to your data.

Visit NOSSAFLEX.io to get some ideas for how to name your files.

The NOSSAFLEX acronym stands for:

NO = Number
SS = Shutter Speed
A = Aperture
FL = Focal Length
EX = Exposure (Over/under)

For us, we commonly name our file like this:

NO01_SS125_A5.6_FL35_EX0

That way you've got all your info at a glance. Print out this sheet and give it a go!

START CATALOGING YOUR ROLL:

Start Date: Roll Name/Number:

End Date: Film Stock:

Camera: Push/Pull:
